

APX 305 TILT & TURN SERIES

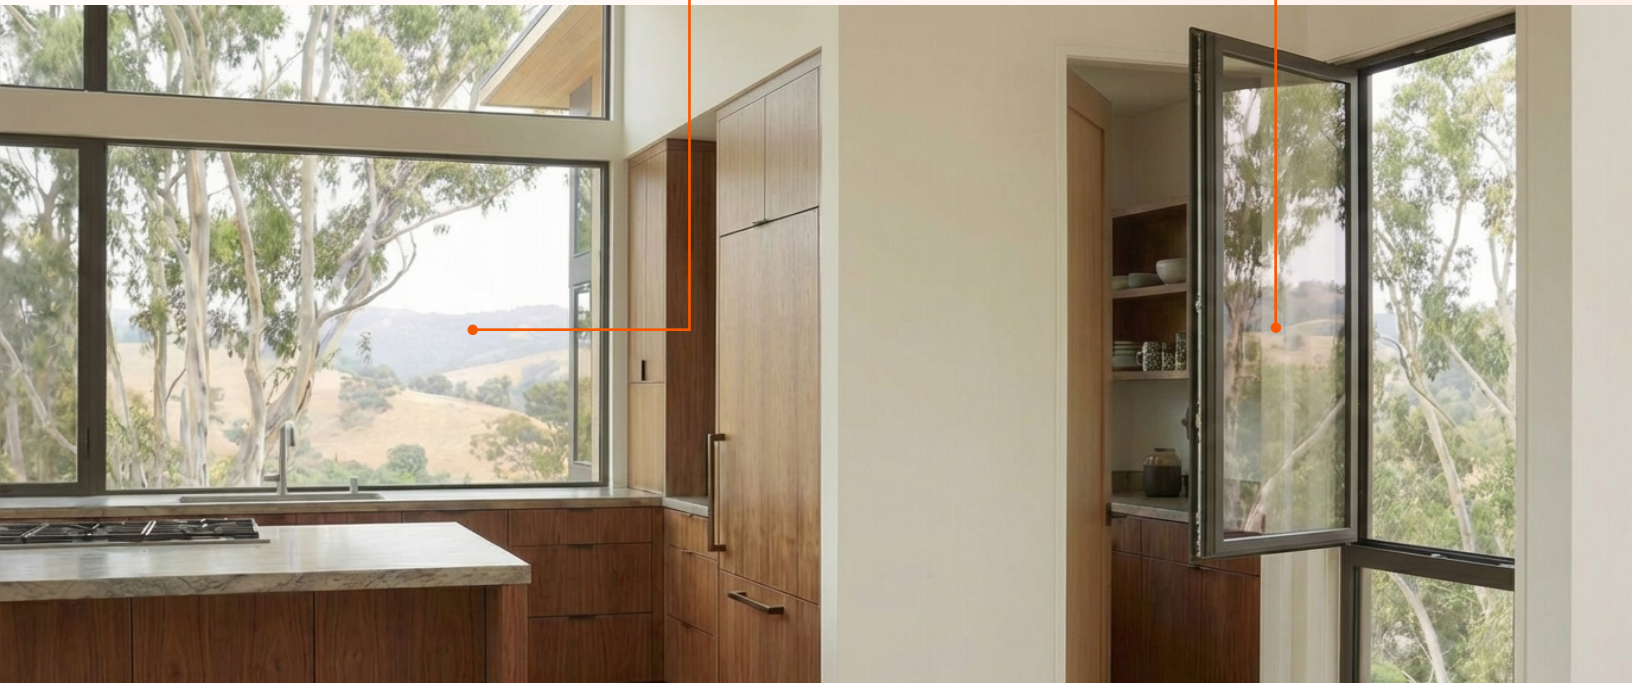

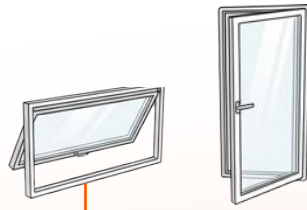

The APX 305 Tilt & Turn Window brings refined European design and functionality to modern homes. This versatile system features a dual-action operation—tilting inward from the top for controlled ventilation or fully swinging inward for easy cleaning, emergency egress, and maximum airflow when needed.

Engineered with premium European hardware, including sleek Hoppe handles, the APX 305 offers smooth, reliable operation while maintaining the clean, contemporary look of the ARC window system. Its thoughtful design delivers both everyday practicality and modern ARChitectural aesthetics, making it an ideal solution for projects that prioritize performance, flexibility, and streamlined design
